DETAILED ACTION

Election/Restrictions

1. Applicant's election with traverse of Group I, claims 1-8 in Paper No. 14 is acknowledged. The traversal is on the ground(s) that the method only creates a "centralizer" and no other products. This is not found persuasive because the product as claimed can be made by another and materially different process such as machining a tempered steel blank; or the blades can be made separately and attached to the body; or only the blades are tempered.

The requirement is still deemed proper and is therefore made FINAL.

2. Claims 9-18 are withdrawn from further consideration pursuant to 37 CFR 1.142(b), as being drawn to a nonelected invention, there being no allowable generic or linking claim. Applicant timely traversed the restriction (election) requirement in Paper No. 14.

Claim Rejections - 35 USC § 103

3. The following is a quotation of 35 U.S.C. 103(a) which forms the basis for all obviousness rejections set forth in this Office action:

(a) A patent may not be obtained though the invention is not identically disclosed or described as set forth in section 102 of this title, if the differences between the subject matter sought to be patented and the prior art are such that the subject matter as a whole would have been obvious at the time the invention was made to a person having ordinary skill in the art to which said subject matter pertains. Patentability shall not be negated by the manner in which the invention was made.

4. Claims 1-8 are rejected under 35 U.S.C. 103(a) as being unpatentable over Mikolajczyk (US 5,095,981) in view of Fuller (US 4,081,203) or Fischer (US 5,031,709) or Grayson (US 3,648,612) or Rivas et al (US 4,913,230).

Mikolajczyk '981 discloses the invention as claimed except that the centralizer is not disclosed as comprising a tempered metal. However, it would have been obvious to one of

ordinary skill in the art at the time the invention was made to make the centralizer of Mikolajczyk from a tempered metal because it is well known in the art to make centralizer of tempered metal or steel to increase its strength and hardness, thereby extending its service life, as evidenced by Fuller (column 2, lines 12-21) or Fischer (column 3, lines 41-43) or Grayson (column 4, lines 55-68) or Rivas et al (column 2, line 66 through column 3, line 3).

As for claims 3-7, it would have been obvious to one of ordinary skill in the art to use the material as claimed since it has been held to be within the general skill of a worker in the art to select a known material on the basis of its suitability for the intended use as a matter of obvious design choice. *In re Leshin*, 125 USPQ 416.

Conclusion

5. The prior art made of record and not relied upon is considered pertinent to applicant's disclosure.
